AMS32 VIEW COMPLEMENTARY SOFTWARE FOR AMS32

The 'AMS 32 View' software is the complementary software of the 'AMS 32 Area Monitoring System'.

It displays the data recorded by the 'AMS 32' in a table, on a map or as a graph. With its help the user can follow the results of the actual measuring or can review any of the data recorded previously by the 'AMS 32'. The 'AMS 32 View' can be installed on more computers, different from the one doing the data collection with 'AMS 32'. The computers must belong to the same LAN.

The 'AMS 32 View' can be used only with the 'AMS 32', it is not able to record data as a standalone software.

System requirements:

- AMS32 connection
- Win10
- PIII 1000 MHz or better
- At least 256 MB RAM
- At least 100 MB free disk space a HDD-n
